

1. Print out this document.
2. The watchcases illustrate the different case sizes only, please compare with the product data to avoid bad buys.
3. Cut out the ruler and wrap around your wrist. Hold it as tight or loose as you like to wear the watch later on.
4. Mark the correct circumference with a pen.
5. Spread the ruler and double check the circumference with a real ruler or real tape measure.
(the control is very important, since every print out can vary a little depending on different printers and settings)
6. The determined measure can be filled in on our website special wrist circumference field on product page or basket page.
